* "EV" Elemental Value, also known as "IV" Ingredient Value, is determined by multiplying the mineral's percentage by the actual amount per serving. For example: 2,016 mg of calcium x 0.31 = 625 mg elemental or pure calcium.

** "DV" represents "Daily Value". Percent Daily Values (DV) are based on a 2,000 calorie diet. Your daily values may be higher or lower depending on your caloric needs.

*** Sugar identified is naturally occurring from Shark Cartilage, Colostrum, Fibersol-2, Natural and American Cocoa. Natural occurring sugar in ingredients, NO SUGAR ADDED. Observations show no evidence of increased blood glucose levels.
